Good Morning Erica,

I hope all is well with you. This email is to request correspondence for air permitting at the Muscogee Nation Meat Processing Plant. I have attached all the following documentation you requested.

We have not received the stationary emergency generator on-site yet, we don't have the serial or identification number, but I have attached the make/model of the exact same stationary emergency generator we will be implementing. The emergency generator will only be used for an independent source of electrical power for the Meat Processing Plant, on loss of normal power supply.

I will be sending three separate emails, since the documents are large. If you need any additional information or documents, please contact me.

Regards,

Mr. Brett Sands
